SOFTWARE ENGINEER

Full-Stack Web Developer | Expert in Laravel & Vue.js

Experienced Software Engineer with over 5 years of expertise in designing, developing, and deploying applications using Laravel, Vue.js, and other technologies. Skilled in creating scalable, efficient solutions tailored to business needs. Successfully contributed to projects in diverse fields, including fintech, education, and accounting, delivering high-quality software solutions that drive results. Passionate about solving complex problems and thriving in collaborative environments as a Full-Stack Developer.

WORK EXPERIENCE

Software Engineer

Freelance, Aug 2019 - Present

- Delivered custom web solutions for clients across various industries, focusing on developing efficient, user-friendly, and scalable applications.
- Worked on diverse projects, including e-commerce platforms, management systems, and dynamic reporting tools, leveraging technologies like Laravel, Vue.js, Bootstrap, Tailwind CSS, JavaScript, jQuery, MySQL.
- Provided end-to-end development services, including requirement analysis, design, development, testing, and deployment.
- Specialized in enhancing existing systems, optimizing performance, fixing bugs, and integrating third-party APIs to meet unique business needs.
- Built strong client relationships through effective communication, on-time delivery, and delivering high-quality results.

Software Engineer

Wings Company, Dec 2023 - Aug 2024

- Improved and maintained an existing school management system (SMS) built with Laravel and Vue.js, optimizing code quality, fixing runtime issues, enhancing database queries, and restructuring tables for better performance as the dataset scaled. Developed and refined APIs to support mobile application integration.
- Contributed to a Learning Management System (LMS) project built with Laravel and Tailwind, adding new features to enhance functionality. Successfully integrated CodePay as a payment method, enabling organizations to generate and sell unique codes that users can redeem to purchase courses.
- Focused on delivering high-performing, scalable solutions while ensuring code maintainability and system efficiency.

Software Engineer

Kitsys Company, Jun 2023 - Nov 2023

- Developed and maintained APIs for a school management system (SMS) using Laravel, handling core functionalities such as managing students, teachers, and subjects. Implemented a microservices architecture where services communicated seamlessly via gRPC.

- Built an e-commerce project dashboard using Laravel Filament, enabling efficient management of the platform. Designed and deployed APIs to support integration with a mobile application, ensuring smooth user experiences across devices.
- Focused on delivering scalable, robust, and maintainable backend solutions while collaborating closely with frontend and mobile teams to ensure successful project outcomes.

Full Stack Developer

SmartLife Company, Jul 2022 - May 2023

- Enhanced and maintained an existing ERP system built with the PHP CodeIgniter framework, resolving bugs, optimizing performance, and improving code quality for better maintainability and efficiency.
- Developed a smart dynamic reporting feature, empowering customers to generate custom reports tailored to their specific needs, improving data accessibility and decision-making capabilities.
- Designed and implemented a documentary system using Laravel, centralizing and organizing company system documents for streamlined access and management."
- Collaborated with stakeholders to identify improvement opportunities, implement new features, and ensure the ERP system met evolving business requirements.
- Focused on delivering high-quality solutions that enhanced system usability and customer satisfaction.

Full-stack Developer

Ysys Company, June 2021 - May 2022

- Designed and developed scalable web applications, with a focus on both server-side logic and client-side components.
- Contributed significantly to Floosak, a finance wallet built with Laravel, handling various aspects including report generation, problem-solving, feature implementation, and integration with third-party providers to enhance functionality.
- Integrated third-party APIs and services to expand application capabilities and ensure seamless interoperability.
- Managed and maintained various server environments, including hosting solutions, database management systems, and cloud infrastructure (e.g., Forge, Namecheap), ensuring optimal performance and reliability.
- Collaborated with team members to support development efforts, ensuring smooth integration of code and overall project success.

EDUCATION

2015- 2019
Sana'a University
Bachelor of Science (Information Technology)

CORE STRENGTHS

- Team Work
- Creative vision
- Problem-Solving
- Attention to detail
- Curiosity for learning
- Analytical bent of mind

SKILLS

- **PHP** (Laravel & CodeIgniter)
- **Git** (GitHub - Bitbucket -Gitlab)
- **DB** (MySQL - SQLite)
- **HTML - CSS**
- **Bootstrap & Tailwind**
- **JavaScript & jQuery**
- **Vuejs**
- **RESTful API**
- **GRPC - Protobuf**
