SENIOR PHP / LARAVEL SOFTWARE ENGINEER

Backend-Focused Full-Stack Developer | Laravel & Vue.js

Senior Software Engineer with 6+ years of experience building scalable web applications using Laravel, PHP, and Vue.js. Experienced in designing enterprise systems, RESTful APIs, and modern business platforms across fintech, ERP, education, HR, accounting, and project management domains. Passionate about clean architecture, maintainable code, performance optimization, and delivering reliable production-ready software.

WORK EXPERIENCE

Software Engineer

Elevenz Company, Feb 2026 - Present

- Developing and maintaining enterprise web applications using Laravel and Vue.js.
- Building and enhancing a Design & Finishing Project Management Platform, enabling project planning, task tracking, budgeting, document management, and collaboration between stakeholders.
- Designing scalable backend services and RESTful APIs while improving application performance and maintainability.
- Collaborating with cross-functional teams to deliver production-ready features following modern software engineering practices.

Software Engineer

Noot Company, Nov 2024 - Jan 2026

- Developed and maintained core features for a multi-tenant SaaS ERP platform serving businesses across Saudi Arabia.
- Built scalable backend systems, business workflows, and admin dashboards using Laravel and Laravel Filament.
- Designed and maintained secure RESTful APIs for HR, accounting, CRM, inventory, and POS modules.
- Improved application performance through database optimization, queue management, caching, and clean architecture practices.
- Collaborated with cross-functional teams in an Agile environment, contributing to system design, code reviews, and high-quality feature delivery.

Software Engineer

Wings Company, Dec 2023 - Aug 2024

- Improved and maintained an existing school management system (SMS) built with Laravel and Vue.js, optimizing code quality, fixing runtime issues, enhancing database queries, and restructuring tables for better performance as the dataset scaled. Developed and refined APIs to support mobile application integration.
- Contributed to a Learning Management System (LMS) project built with Laravel and Tailwind, adding new features to enhance functionality. Successfully integrated CodePay as a payment method, enabling organizations to generate and sell unique codes that users can redeem to purchase courses.
- Focused on delivering high-performing, scalable solutions while ensuring code maintainability and system efficiency.

- Built an e-commerce project dashboard using Laravel Filament, enabling efficient management of the platform. Designed and deployed APIs to support integration with a mobile application, ensuring smooth user experiences across devices.
- Focused on delivering scalable, robust, and maintainable backend solutions while collaborating closely with frontend and mobile teams to ensure successful project outcomes.

Full Stack Developer

SmartLife Company, Jul 2022 - May 2023

- Enhanced and maintained an existing ERP system built with the PHP CodeIgniter framework, resolving bugs, optimizing performance, and improving code quality for better maintainability and efficiency.
- Developed a smart dynamic reporting feature, empowering customers to generate custom reports tailored to their specific needs, improving data accessibility and decision-making capabilities.
- Designed and implemented a documentary system using Laravel, centralizing and organizing company system documents for streamlined access and management."
- Collaborated with stakeholders to identify improvement opportunities, implement new features, and ensure the ERP system met evolving business requirements.
- Focused on delivering high-quality solutions that enhanced system usability and customer satisfaction.

Full-stack Developer

Ysys Company, June 2021 - May 2022

- Designed and developed scalable web applications, with a focus on both server-side logic and client-side components.
- Contributed significantly to Floosak, a finance wallet built with Laravel, handling various aspects including report generation, problem-solving, feature implementation, and integration with third-party providers to enhance functionality.
- Integrated third-party APIs and services to expand application capabilities and ensure seamless interoperability.
- Managed and maintained various server environments, including hosting solutions, database management systems, and cloud infrastructure (e.g., Forge, Namecheap), ensuring optimal performance and reliability.
- Collaborated with team members to support development efforts, ensuring smooth integration of code and overall project success.

EDUCATION

2015- 2019

Sana'a University

Bachelor of Science (Information Technology)

CORE STRENGTHS

- Team Work
- Creative vision
- Problem-Solving
- Attention to detail
- Curiosity for learning
- Analytical bent of mind

SKILLS

- **PHP** (Laravel & CodeIgniter)
- **Git** (GitHub - Bitbucket -Gitlab)
- **DB** (MySQL - SQLite)
- **HTML - CSS**
- **Bootstrap & Tailwind**
- **JavaScript & jQuery**
- **Vuejs**
- **RESTful API**
- **GRPC - Protobuf**
- **Linux**
- **Docker**
